Panopto: Installing the Panopto Recorder
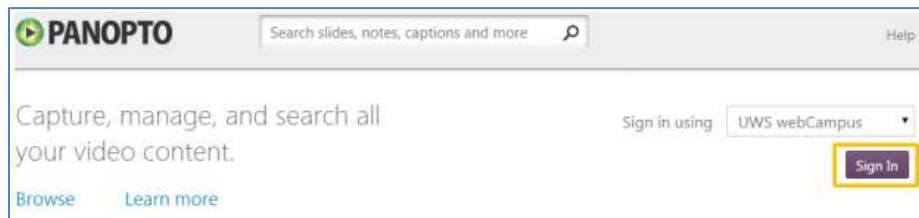

To download the Panopto recorder, start by logging in to the UWS Panopto server at: https://uws.hosted.panopto.com/

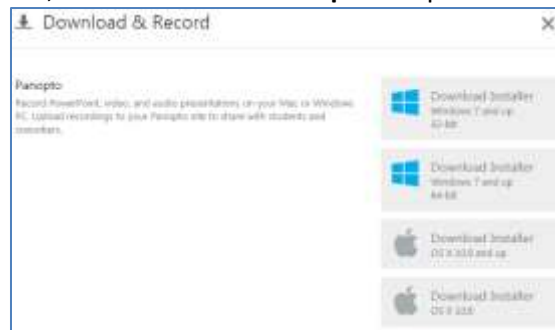

Go to and click the **Sign In** button to the right.

- If you are not logged into webCampus, you will be directed to the webCampus login page. Type your UWS credentials into the log in fields and click the **Log in** button. Once you are authenticated, you will be directed back to the UWS hosted Panopto website.

- If are logged into webCampus, you will automatically be logged into Panopto.

In the top right corner under your name, select **Download Panopto** to open a list of available software to download.

Choose the recorder that applies to your computer to begin downloading the application. Next, locate the "panoptorecorder.exe" file to **Open** and **Run** the application.

When the completion of the installation process is finished, open the Panopto Recorder.

The server address may be automatically entered for you. If not, the UWS Panopto server address is: **uws.hosted.panopto.com**

Sign in to the Panopto Recorder by choosing **Sign in with UWS webCampus**. You will be directed to the webCampus login page. Type your UWS credentials into the log in fields and click the **Log in** button. Once you are authenticated, you will be directed back to the Panopto recorder.
